

SSD Solid State 3.5" SCSI Hard Drive for: **BOSCH FSA 560 / FSA 600 Motor Testers**

Mechanical SCSI hard drives have been the backbone of technical computing for nearly 30 years. Though they typically don't possess much in the way of capacity, SCSI drives make up for it with speed. They spin at 7200 or 10000 revolutions per minute or even higher. It is this characteristic that ultimately destroys them. The cost of 50-pin SCSI drives have rocketed in recent years making them uneconomical to replace ... Until now!

We have developed a reasonably priced, direct replacement Solid State Drive for the Bosch FSA 560 & FSA 600 Motor testers.

Order numbers

FSA 560 SCSI

FSA 600 SCSI

The benefits at a glance

- ▶ Cost effective replacement
- ▶ No moving parts, giving lasting reliability
- ▶ Rapid computer start up
- ▶ Functions perfectly in low temperatures
- ▶ Low power consumption - Uses SCSI BUS power
- ▶ Direct replacement without any modifications
- ▶ Global shipping *
