

Exhaust Gas Measurement

BEA 950

THE LATEST PREMIUM EXHAUST GAS STATION FOR THE HIGHEST DEMANDS

BENEFITS OF THE BEA 950 AT A GLANCE

- ▶ Premium emissions test station for demanding workshops
- ▶ Sturdy construction
- ▶ Bluetooth connection between PC, BEA 030 and KTS 5XX
- ▶ Optional battery operation with the diesel smoke-head (BEA 070)
- ▶ Short setup and warmup times
- ▶ Modular expandable solution: works with control unit diagnosis, ESI[tronic] troubleshooting instructions and FSA vehicle system analysis options
- ▶ Supports the Bosch workshop networking concept Connected Workshop
- ▶ Fully approved DVSA software

Exhaust Gas Measurement BEA 950

WORKSHOP SOLUTION

The user-friendly exhaust gas measurement system BEA 950 offers everything needed to quickly and cost-effectively test gasoline and diesel vehicles. It is the perfect solution to current and future demands of workshops. All measurement modules, control unit testers, PC, 19" monitor, keyboard and A4 Laser printer come in a compact package on a trolley.

Technical Data

Power pack supply voltage 100 – 240 V

Operating temperature range 5 °C to 45 °C

DURABLE

Thanks to its sturdy construction, the BEA 950 is well-equipped for tough everyday workshop use. In short, it is a premium solution designed for more efficient working processes, satisfying even the highest demands.

Scope of delivery

Premium trolley
UK mains lead plug & accessories
PC, monitor, mouse, printer
Keyboard (GB)
BEA 030
BEA 055 with 02
BEA 070 un-calibrated
BEA 070 cleaning brush
BEA PC-SW UK
KTS 515 (with integrated power supply & USB lead)
Probe (Petrol car) incl. 8m hose
Probe (Diesel car) incl. 1m hose
Probe seal for leak testing
Temp probe (90cm)
B+/B- connection
TN/TD connection
Calibration pin
Remote control
Retrofit kit accumulator (optional)
Charging station (optional)

Subject to technical and program changes.
